FRIDAY, JULY 28

Acadia Federal U.F.A. Constituency Associa- tion Meet in Hanna

(By Mrs. C. A. Bishop)

Acadia Federal Constituency convention opened in Memorial Hall, Hanna, at 11:00 a.m. on June 24, with President J. Cameron of Wadena in the chair.

The morning session included the routine business. Financial report followed by the Provincial address in which Mr. Cameron gave a report on what action was taken on the resolution passed at the last convention.

The afternoon session was opened by musical numbers from the Natos and Craigmyle Juniors. Miss Viola Chisholm, Junior Director for Acadia gave a very fine report on the Farm Young Peoples Week just concluded in Edmonton. Miss Dorothy McAuliffe of Craigmyle, who won the Old Scholarship last year gave a very lucid account of her year at the School of Agriculture, telling of the great benefit derived both from the Reading Course by which she won her scholarship and the year's work at Oide.

Mrs. E. Price, President of U.F.W.A. at Stettler, spoke for some time on Women's Work and the importance of the Juniors asking the senior members to give them all the help possible for it is to these young people we must look for the better to-morrows. She appealed to the women for further study and thought on child welfare, particularly before Juvenile Delinquency etc.

Mr. Robt. Gardiner spoke for a short time in the afternoon, and a greater length in the evening reviewing the legislation passed at the Ottawa session just closed. Among these were the trade treaties entered into last fall, the Pension Act changes which makes it easier for the appeals to be heard, also some relief given the Soldier Settlers in interest discount on their indebtedness.

(Concluded on page 2.)

Rural School Trustees Met in Oyen Saturday

Resolution Asking Permission to
Close Schools for One Year is
Forwarded to Edmonton

A meeting of fourteen trustees, representing rural school districts was held in Oyen last Saturday, when matters pertaining to the finance problems of their respective districts were discussed. A letter from G. W. Gorman, chief inspector of schools in the province, addressed to one of the school boards was read, and after a discussion, a resolution was framed and forwarded to the government asking if permission would be granted to close rural schools for one year. One paragraph in Mr. Gorman's report, read: "In answer to your letter of the 11th, inst., I beg to advise that there is no way in which direct assistance can be extended by this Department to your district. The Board will have to rely upon the council of the Municipal District for such advances as will permit of continuing the school in operation."

Owing to the very serious condition existing throughout the district, the trustees attending the meeting, felt that drastic steps should be taken, to relieve tax payers from further burdens.

Another meeting of school trustees will be held on Saturday, July 15, to review the situation, and hear the reply from the government to the resolution sent in. It is hoped that a large representation of trustees throughout the district will attend.

Among the interesting groups to visit Alberta during the past two weeks was the party of 51 delegates to the world's postal congress, headed by Sir Frederick Williamson, C.B., director of the British postal services.

Personal Paragraphs

See who's here!

One of our old timers, who was hauled down to the Kindersley hospital with a flock of broken ribs and a pierced lung, is out, home again, and rarin' to go, by gosh, all in the space of about four days. Speaks well for "Doc" McPhail and the laying on of hands or healing powers of the Kindersley nurses.

Sees World Wheat Surplus And Believes Curtailment Of Production Is Only Solution

In the April issue of Canadian Business, writing under the pseudonym of John Marquis, an authority on the wheat situation had an article in which, after analyzing the situation as he saw it, he reached the conclusion that no real evidence exists of a world surplus of wheat. In the current issue of this organ of the Canadian Chamber of Commerce, John I. McFarland, general manager of the Canadian Co-operative Producers Limited, makes a spirited reply, in which he questions the basis of this conclusion, puts forth figures to indicate that there is a surplus and argues the need of acreage reduction.

Mr. McFarland states that statistics show that the visible supply of wheat had commenced to accumulate before the unusually good crop of 1928 and since its disposal they have continued to accumulate. He quotes the International Institute at Rome to the effect that wheat stocks will experience a further percentage increase during the present season, that exportable stocks will have risen from 560 millions in August 1 last year, to 650 millions by next August. Total international trade for this year, he states, is estimated to be somewhere between 120 and 164 million bushels, and that the exportable carryover surplus represents 100 per cent. of the total international trade for a year. The surplus, he asserts, becomes a quantity of paramount importance as a price making factor. Based on the present world stocks and with average crops, he states, the world's surplus will continue to increase.

As regards the position of Canada, Mr. McFarland sets forth that before the war this country supplied about 13 per cent. of the world's international trade in wheat. Since then Canada has increased her acreage greatly. If this country continues its present acreage and range average per acre, it will export approximately, says this authority, that Canada must secure very close to 50 per cent. of the world's trade in wheat. He goes on to state that to dispose of its crops. Does anyone believe, he inquires, that other countries are going to leave to Canada the privilege of supplying this product?

What is the solution for the conditions described? According to Mr. McFarland, the only method by which there may be any permanent advance in prices is by a world-wide reduction in acreage. In this case, he thinks, Canada, about the only one to have increased her acreage by a much greater percentage than any other exporting country. He goes on:

"The Laws of Nature of the Acts of Providence might conceivably reduce production on this over-expanded acreage, but such reduction can only be of a temporary nature, because after all these years—years of years—there may be some permanent averages. Therefore, it appears that there is only one way of permanently correcting the unsound conditions and that is by the actual reduction in acreage."

Mr. McFarland buttresses his contention with the statement that the United States has fed an unusually large quantity of wheat to animals during the last three years—a quantity sufficient for a year's normal supply. He points to this as an answer to the people who say there is no overproduction and that the problem is only one of underconsumption. The viewpoint thus set out is the viewpoint of a large element in the West which favors acreage reduction, curtailment of production and control of distribution.

Rail-Bus Is Sproedy
The "rail-bus," a new type of vehicle with a 100-horsepower steam engine, has just been placed on the Brighton-Dwight Dyke line of the Southern Railway of England. It will accommodate 44 passengers, and its top runs has speeded over 60 miles an hour.

The distance from the earth to the most distant known nebula is 900,000,000,000,000,000 miles or about 140,000,000 light years. This is the greatest length ever actually measured.

"What is the best thing to do with a suddenly found elephant?" asked bull? asks a correspondent. About fifteen miles an hour.

W. N. U. 2000

Canadian Mosquitoes

About Sixty Species Of This Pest Found In Canada

There are about sixty species of mosquitoes in Canada, many of which feed on the blood of man. Although the majority of them, particularly the kind known as Aedes, are most troublesome in pond and woodland, in certain seasons, at present, as the result mainly of non-control, they often cause considerable annoyance indoors as well. Their attacks are most noticeable at dusk, and in warm, dull, humid weather. In autumn and winter, also, complaints are frequently received of the presence of numbers of mosquitoes in cellars and basements. These mosquitoes are the hibernating females of the genera Culex and Anopheles which pass the winter as winged adults in protected situations. Attacks from these pests are, however, in many parts of Eastern Canada, the cosmopolitan house mosquito, known scientifically as Culex pipiens, is now well established, especially in towns and cities, and in one large city has become a public nuisance. This species, which is found in great numbers, particularly at night. How housewives and others can combat the mosquito menace is fully explained in a pamphlet issued on request by the Dominion Department of Agriculture.

World's Largest Zinc Mine

Sullivan Mine At Kimberley, B.C.

The Sullivan mine at Kimberley, British Columbia, is the world's largest producer of zinc ore and one of the world's largest producers of the metal. The mine has produced a grand total of 1,506,153 tons of lead, 1,261,473 tons of zinc, and 184,466 tons of silver since it began to operate in 1900, up to the end of 1932. The Sullivan is the source of nearly all the zinc lead supply for Canada, and of over 80 per cent. of the production of silver. It has held silver in the production of silver.

For Steele mining division, in which the Sullivan mine is located, has several other silver-lead and zinc-lead properties, which in past years have made important contributions to the output. Many years ago this district was an important producer of silver, gold, and copper, and in the place prospects are again active, due to the present premium on gold. There are also in the Fort Steele area a variety of non-metallic minerals, such as gypsum and crystalline rock magnesite.

No More Constantinople

City Now Called Istanbul and Is Not Turkish Capital

The British two times remember about Constantinople nowadays is that it is not the capital of Turkey and that it is not called Constantinople. The capital is Ankara where the President-dictator, Mustafa Kemal, lives on his estate "Pencilini." The city with a million inhabitants and about fifty thousand starving dogs, but some time ago they were taken off to a desert island with no food or water, so that they all ate each other until the survivor died of thirst.

One Great Advantage

School days being once more over there will be many boys and girls with nothing to do and no place to go. Here is where the farm presents advantages over city life. The farm boy or girl can be given some responsibility or some task that will be useful to them and not disadvantageous or costly to the parents. And let them have to spend their vacation days idly—lessen—Farmer's Advantage.

Used Discretion

When a herd of 36 elephants paid no attention to the furious blowing of a locomotive whistle as they leisurely crossed a railway track between Bulawayo and Gwelo, Africa, the engineer had to stop his train until they were out of the way.

To utilize surplus sugar, Czechoslovakia is converting it, mixed with bran and other ingredients, into fodder for horses, cattle and pigs.

After the record hop from Spain

Showing little effects of the strain of their hazardous flight, Captain Mariano Barbera (left) and Lieut. Joaquin Collar, Spanish Army flier, are shown at Camaguey, Cuba, on the completion of their record flight from Sevilla, Spain, in the plane "Cuatro Vientos" (top). Their route took them over 4,000 miles of ocean.

Electricity keeps Utah on clouds at Chicago Fair

Electricity keeps Century of Progress officials at Chicago informed as to just what the number of persons inside the grounds is at any time. Turnstiles at the various entrances are equipped with counting and recording devices with a central dial in the comptroller's office. A glance at the dials tells how many persons have entered the grounds, how many left and what entrances and exits were used. The information is used in distribution of guards and changes at entrances to notify transportation companies when there is a rush from the grounds and at what exits, and to keep concessionaries informed of the size of the crowds so they will not run out of supplies.

Needs a Pension

Hadi Bey a Turk, has 43 children—38 boys and five girls. This is believed to be a record. The Sultan used to give Hadi a yearly bounty, but this has been stopped. Hadi has now applied to Mustapha Kemal Pasha for a pension.

British railway passenger cars have sufficient seats to accommodate more than one-twentieth of the population.

A pedestrian is defined by an exchange as a married man who has a car and a couple of sons.

Distinguished Canadian Artist

Wild Flowers Lived Under Brush Of Late Robert Holmes

Three years ago Robert Holmes, artist, died. After Waterloo writes of the painter of wild flowers. The Challenger: "One day in 1809 a young milliner of the Kawartha Lakes district, gave a trimmings of artificial flowers, and bonnets with artificial flowers, and settled down to housekeeping with her young husband in Cammington, Ontario. She planted seeds and bulbs and her garden became the best in the village. Not much wonder that the artist noticed her. It was therefore not so strange that when he drew pictures for the first number of the Art Student's league calendar, he should choose as his subject the back doorway to that house, his mother inside washing dishes, and outside directly in her line of vision, the grapevine, the lilacs and poppies massed against the walls.

Not even remarkable that the back, brought up with such a background, should finally become Canada's most distinguished painter of flowers, and the greatest painter in America of wild flowers in their native setting.

The drenched, dove stripe orchid and the purple, the red, the white, colors, are never stiff poses, but always seem to be growing in the garden, and the artist's hand found the power to put this subtle sense of life into what are usually regarded as still life pictures. Yet it took weeks of work to picture that spirit that made you smell the perfume and feel the breeze as he did.

"He was a student of the Toronto Art Society and of the Royal College of art in London. He chose Canadian wild flowers for his designing class as a peculiarly native Canadian motif on which to base their work. With the words 'flowers on his lips he died, and according to his wish he was buried in a little lot beside the woods where he so often wandered as a boy."

Want African Colony

Germany Seeks Room For Expansion And Means To Pay Debt

Germany is asking the world for an African colonial empire. A memorandum prepared by Dr. Adolf Hugenberg, German minister of economics, for the economic committee of the world conference, there were two possible ways of increasing Germany's capacity to meet her international debts—first, by giving her an African empire where large public works schemes could be carried through; or second, by opening other new territories "to this people which has not enough space in which to live."

Money From Trees

Australia, strange as it may seem, is turning its young people that money grows on trees. Under able guidance, state school children of Victoria have set out 4,000 acres of gum trees that will be worth \$3,000,000 on maturity. Profits from the sale of bark and timber will be used to provide scholarships, libraries, radio and sports materials—Christian Science Monitor.

Leaves Nothing To Chance

Electricity Keeps Utah on Clouds At Chicago Fair

Electricity keeps Century of Progress officials at Chicago informed as to just what the number of persons inside the grounds is at any time. Turnstiles at the various entrances are equipped with counting and recording devices with a central dial in the comptroller's office. Present Year Marks The Diamond Jubilee Of The Royal Canadian Mounted Police

Price Of High Life

Famed Embassy Club Cat Killed By High Fives

Jackson the "High Life" cat, the most famous cat in Mayfair, and perhaps in the world, is dead. Felix, the phantom of the movies, could not hold a candle to Jackson. He was an aristocrat. Kings paid court to him, but he seldom deigned to notice them.

Jackson was the mascot of the Famed Embassy Club in London's Bond Street. He figured in novels, caricatures and innumerable gossip columns.

Now like other martyrs to the cause of High Life, he died of acute indigestion at the comparatively early age of eight. It is impossible to estimate how much smoked salmon, fine peas, leg of chicken and caviare he ate in the eight years he associated with the elite who passed through the portals of the Embassy Club.

Guest after distinguished guest tried to pay court to him with tidbits. Often he turned disdainfully away, but not often enough. It got him in the end.

Luminous green eyes, arched back, half as a rascal, Jackson walked away, but not often enough. It got him in the end. Luminous green eyes, arched back, half as a rascal, Jackson walked away, but not often enough. It got him in the end.

Corral Not A Rock

Every Inch Is Built By Thy Sea

Corral, he is not a rock. It is made of seaweed. It is really an animal something like a sea-anemone jellyfish. It has a central body, and it has many tentacles round its mouth, and when it has caught its food it draws it through its body or through its mouth. It is continually sucking in. This sea-water contains lime. The lime is used to build the corral animal during the time from the water and its use to build a tiny platform for it to rest on. Gradually it makes a home for itself in the rock, and in that it lives till it dies. Then the next corral animal comes along and builds its little shell of lime, and so on. After thousands of years of this, these creatures will have made a huge mass of lime, which comes above the surface of the sea and make a coral island. The Great Barrier Reef, off Australia, is hundreds of miles long, yet every inch of it was made by these tiny creatures.

Historical Garden Races

Origin Of Beautiful Hybrid Perpetuals

At the end of the eighteenth century the China rose with its habit of continuous bloom was brought to France by a Chinese merchant. The first, Dr. Macoun, in discussing the probab origin of the beautiful hybrid perpetual roses in Canada. Before the war of 1812 the China rose with French and Provence roses were raised. They were called Hybrid Chinas, but took after their European parents in that they flowered only once in the season. These hybrids and the damask rose were then crossed, and Rose du Roi, a damask perpetual, was introduced about 1819. This rose was called perpetual because it had a second blooming season. Six years later Gloire de Rosanes appeared, followed by rapid improvement of this class, and in the latter years the garden favorites as General Jacquemont and Jules Margottin were introduced. In Canada many of the hybrid perpetual bloom, once only in the season.

Wrapper And All

The general practice to wrap things in cellophane has many advantages. Take the case of the near-sighted man who ordered a ham sandwich at a lunch counter for example.

"Was that sandwich quite fresh that you sold me?" he asked.

"Quite new," replied the lunch counter attendant. "Each one is wrapped in transparent, airtight paper."

"I'd known that,"

Bit Of A Puzzle

"I'm glad you're so impressed, dear, by these explanations I've been making about banking and economics," remarked the young economist.

"Yes, darling. It seems wonderful that anybody could know as much as you do about money without having any of it."

FRANCO-U. S. TROUBLE WAS SOON ADJUSTED

LONDON, Eng.—The secret meeting at which Franco-American differences were adjusted provided the most dramatic incident since the inception of the world economic conference. The meeting was held in a private room in a secluded part of conference headquarters.

Prime Minister Ramsay MacDonald, president of the conference, knew the full import of the meeting. Veteran or innumerable international conferences, he remained alone in an adjoining room, pacing the floor, his hands clenched. Back and forth, back and forth, he walked, his silvered head bent toward the door, listening for the knock which would mean that the conference was saved or that it had collapsed.

When Mr. MacDonald was informed his face lit up with joy.

At a press interview Cordell Hull, the United States delegation leader, declared that undue emphasis had been placed on temporary currency stabilization and that the United States deems such action now "unnecessary."

Snow Slide Victim

Find Bodies Of Two Men Lost Since Last February

Field, B.C.—One dead body had been found and another was being sought by a party of three men, including a brother, John, 23, lost in Duchesne Pass since last February. The young man had been seen by a party of three men, including a brother, John, 23, lost in Duchesne Pass since last February.

Discovery of the bodies was made by two Swiss guides, Rudolph Ammer and C. Haesler, who were conducting a search of the pass. Searchers have been unable to find the bodies since the young men disappeared, a brother Frank, 20, making trips through the area at every opportunity.

Parents of the young men reside at Pass.

Famous Racing Motorist Dead

Sir Henry Birkin Was Victim Of Blood Poisons

LONDON, Eng.—Despite a desperate battle by doctors, Capt. Sir Henry Birkin, 36, a famous racing motorist, died in a London nursing home from the effects of blood poisoning resulting from burns received in the Tripoli Grand Prix in May.

Sir Henry had been critically ill for three weeks, and three blood transfusions were tried.

He had been one of Great Britain's leading drivers since 1927.

Sir Henry Birkin was born July 26, 1886. He succeeded his father in the baronetcy in 1925.

In 1905, he served in the war from 1914 to 1918.

Trouble Over Taxes

Ten People Reported Killed In Riots In Poland

Warsaw, Poland.—Nine persons and one policeman were officially reported killed, when police forced peasants to cease beating tax collectors in the Galician districts of Rzeszów, Rzeszów and Lublin. Sixteen persons were seriously wounded. Many arrests were made and numerous peasants escaped to the forests.

Grasshopper Invasion

Winnipeg, Man.—Thirty thousand acres of green crops in Winchester municipality, southwest Manitoba, were threatened with destruction by an invading horde of grasshoppers on the western Canadian prairie, trapped by a searing sun during last week's heat wave, failed to receive the much-needed moisture promised.

Theft From Mint

Ottawa, Ont.—John R. Wallace, a member of the Royal Canadian Mounted Police, pleaded guilty in police court here to stealing \$65 in gold coins from the Canadian mint. He was remanded for sentence.

Honors For Einstein

Brussels, Belgium.—The University of Brussels recently conferred upon Prof. Albert Einstein the title Doctor Honoris Causa of the faculty of sciences.

W. N. U. 2000

Aids To Navigation

To Install Direction Finding Stations In Hudson Bay Area

Ottawa, Ont.—Paving the way for renewed efforts to reduce insurance losses on the Hudson Bay route, the federal marine department will shortly commence construction of a short wave direction finding station at Chesterfield on the east shore of the bay, a considerable distance north of Churchill.

Installation of additional navigation lights in the strait will not be undertaken this year. The department has no funds for this purpose and, in addition, further survey work is necessary to determine the precise location of the points at which lights would be erected.

It is necessary to be able to mark all lights on navigation charts with absolute accuracy so that navigators when they see a light may fix their position on the line from a known hydrographic survey of the north shore of the strait has not been carried out and if lights were built this year only approximate position could be given.

The direction finding station at Chesterfield is the most important contribution to the Bay route that may be made at this time. This station will give cross bearings on the line from Nottingham Island to Churchill. At the present time there are stations at Nottingham and Churchill but bearings are difficult to obtain. This is the official reaction of the marine department to the annual report of the Imperial Shipping committee on the Hudson Bay route.

Aeroplane Tragedy

Capt. Broath and Two Mechanics Lose Lives In Air Crash

Princeton, Alberta.—The first aeroplane tragedy of the year in northern Saskatchewan claimed the lives of three men near the Brooks air base at Emma Lake, 30 miles north of here.

The dead are: Capt. B. W. "Bill" Broath, pilot, 42. Hiram C. "Buck" Broath, mechanic, 24. T. D. Forsyth, mechanic, 28.

Broath, well known western commander, who served with the Royal Navy Air Service in France and later with the famous Dover patrol, was testing a reconditioned biplane at an altitude of 2,000 feet. With him were Brooks and Forsyth, mechanics of the Brooks Airplane. Prince Albert.

In the middle of their tests the plane dropped in a spin for some unknown reason and plunged into a bay of the lake just north of the air base, at a 4 o'clock in the afternoon, after the machine had been in flight for some time. The pilot, the "plane falling into about 10 feet of water, was smashed to death while the engine buried in the bottom of the lake.

The bodies of Broath and Forsyth were recovered shortly after the crash. The body of Broath had not been recovered. The lake bottom was being dragged for the third body.

Forsyth, mechanic, was scarcely 30 years of age while Broath's head was badly smashed. Brooks was the son of R. D. Brooks, of Prince Albert, president of Brooks Airways.

Lord Montagu Is Fined

Found Guilty Of Common Assault On John Forbes

Victoria, B.C.—Lord Edward Montagu, the second son of the Duke of Manchester, was found guilty of common assault on the person of John Forbes on June 15 and was fined \$75 costs, in default of which he was to be imprisoned ten days in jail, by Magistrate George Jay in provincial police court here. C. W. Brooks, co-defendant, was found guilty of assault causing grievous bodily harm, and was fined \$50 and \$75 costs, or in default, one month in jail. Lord's fine was paid and he was freed.

Organization Dissolved

Berlin, Germany.—The Steel Helmet Veterans' organization throughout the Rhineland has been dissolved its offices and homes closed, and other property temporarily seized. The dissolution was said to have become imperative in order to "cleanse the organization of Marxist and Communist elements, as well as bad political leaders, and preserve it as a non-political defence organization."

Gulls Save Crops

Wolville, N.S.—Farmers who till the soil of the Grand Pre Meadows thank the gulls for their help in saving the crops from the ravages of the locusts. The gulls have been seen eating on millions of grasshoppers which had threatened to ruin the crops.

Review Tariff

Britain Asks Canada To Discuss Duties On Long List Of Articles

LONDON, Eng.—Taking further advantage of the terms of the Canadian-United Kingdom trade agreement, signed at Ottawa, the United Kingdom asked Canada to review the Canadian duties on the list of articles, with a view to revision. The Canadian tariff board is already preparing to review the duties on cotton and textile goods imported from Britain.

The trade pact signed at the Imperial Conference gives each country the right to seek revision in the scale of duties levied by the other on its goods.

Taking Part In Gold Rush

Many Indians Using Sailing Canoes To Reach North

The Pads, Man.—Fleets of sailing canoes, loaded with the gunwales with freight, and manned by Crees, are now drifting along the breezes of the northern lakes, heralding the new summer's gold rush in God's lake.

The purr of the outboard motor is heard right across the hinterland. Even Indians, without the cash to secure outboards, have jumped into the "rush" with canoes, and are swinging paddles, canes and sweeps, as they freight their way into the mineralized zone.

PROPOSAL IS MADE TO REDUCE WHEAT ACREAGE

LONDON, Eng.—The four-power wheat conference adjourned discussions to await statistical information on production from Australia, Argentina, and Soviet Russia after formulating a tentative plan for reduced acreage and export quotas.

Quotas of extensive crop damage in Canada and a short crop in the United States caused delegates to believe the final position may be changed materially.

Stanley Bruce, Australian minister to the United Kingdom, asked that the conference produce some concrete proposal which he might transmit to Canberra for consideration of his government.

It was learned the limitation proposal as now constituted contemplates reduction of acreage by 10 per cent for one year only and that the program for the second year would be decided after the effects of the one-year reduction were known.

Canada, the United States and Argentina were reported agreed with the Polish stand that small producers must be brought into any scheme if disaster is to be avoided.

The Soviet has not been brought into debate yet but some quarters were inclined to the view no enduring solution of the wheat problem would be possible without participation of Russia despite that country's short crop this season.

Limitation of production by way of reduced acreage and the curtailment of exports by a quota system among the nations are the main lines on which the conference is working, while at the same time urgently pleading for some agreement by importing nations on methods whereby they might raise consumption.

The Daily Telegraph said it was believed the world economic conference will begin immediate discussion of a plan for reducing the world wheat output by 10 per cent and absorbing the total carry-over in two years.

REPRESENTS CANADA

Cannot Help Manitoba

Federal Minister Of Trade And Commerce Says There Is No Co-Operation

Winnipeg, Man.—"The Dominion Government cannot help Premier Bracken to finance provincial unemployment and other money issues because he will not play the game with us," Hon. H. H. Stevens, Federal Minister of Trade and Commerce, said in an interview here.

"During the past three years," he continued, "the Dominion Government has earnestly tried to co-operate with the four western provinces. In three provinces they have been successful, but in Manitoba no reciprocal co-operation was forthcoming."

"Not once but repeatedly Mr. Bracken has used the unemployment financing issue for political purposes, which makes it difficult for the Dominion Government to assist the province. I do not think Mr. Bracken has made the efforts which he could have made to handle the relief question."

Predicts Stratosphere Flights

New Type Airplanes Will Make This Possible Says Picard

New York.—Professor Auguste Picard, arriving from Europe, said that the strength of his airplane during his 10-mile balloon ascension, aeroplanes are being built with light steel cabins to make possible flights in the stratosphere.

"These planes should be about 400 and 500 miles an hour," he said. "They will have little resistance because the air at that altitude is so light."

"Once the plane reaches such an altitude the pilot can set the course and cross from America to any point in Europe in a few hours."

Picard will go to Chicago, where he will advise preparations for the stratospheric balloon flight of his twin brother, Jean Picard, and Commander Settle of the United States navy.

STABILIZATION OF CURRENCY BONE OF CONTENTION

LONDON, Eng.—Prime Minister J. Ramsay MacDonald, chairman of the World Economic Conference, was said to be seeking elimination of the monetary stabilization question which constitutes the bone of bitter contention at the party.

The French delegation failed to carry out threats of demanding adjournment as the conference and the United States dollar should be stabilized, but the feeling of anxiety over the problem continued intense in conference quarters.

Quarters were clearly disturbed by the solid lining of many countries opposed to dollar instability and it was unofficially pointed out in comment that one of the chief points of the Washington program was stabilization as such as practical along the lines laid down in the resolution submitted by Senator Key Pittman.

A succession of speakers pleaded for monetary stabilization as essential to restoration of confidence, including representatives of Italy, Switzerland, Poland, Norway, Germany, Rumania and Yugoslavia.

The discussion arose during consideration of a British resolution calling for easy money and cheap credit policies.

The conservative gold standard course was doubted the feasibility of the program and warned of its possible dangers.

RESEALING TARIFF BRITAIN IMPOSES ON FREE STATE

LONDON, Eng.—The Irish Free State quarrel with the United Kingdom arising from the nonpayment of the land tax was long being held in abeyance by the world economic conference in an attack on the practice of imposing punitive tariffs.

The United Kingdom-Irish Free State tariff war was brought to the notice of the conference by Senator Joseph Connolly, Free State Minister of Lands and Forests, in a blunt speech before the private meeting of the sub-committee on commercial policy.

After dealing with the causes of the quarrel as the Irish Free State saw them, Senator Connolly turned to the punitive tariffs which Britain was imposing against Free State goods.

"You will appreciate," Senator Connolly said, "that the British 'how foolish it would be for our delegation to go on laboring towards a solution of tariff problems and restoration to one of the weaker countries in the interests of world economic peace without having this unique special punitive tariff policy, which is being applied to one of the weaker countries by one of the great world powers, brought to your notice.'"

Marine Insurance Rates

Expect Lower Rates May Be Obtained For Bay Route

Ottawa, Ont.—The report of the Imperial Shipping committee found that the insurance rates on hulls and machinery on ships trading into Churchill could not be reduced this year. The committee's findings were extended to apply to ships leaving Churchill as late as Oct. 7, instead of the previous limit of Sept. 30, was made public today by the department of marine.

The report appeared to be optimistic, the lower rates might prevail in subsequent years if safety of the Hudson Bay route were demonstrated.

The report considered at length the ocean traffic into Churchill during the 1932 season when 10 cargo vessels made the passage through Hudson Strait and into Churchill. Nine made successful voyages and one, the "Bright Pan," was a total loss after striking an iceberg.

Reference was made to the former report in which the committee explained that "as long as there are only a few voyages in the season, a single casualty may quite likely shatter the business of the month. The whole of the money received by way of premium."

Forest Fires In Ontario

Slept Over Fifteen Mile Stretch Near Fort William

Fort William, Ont.—Only partially checked by a sudden shift in the wind, the forest fires in the northwestern part of Ontario, which have consumed 200,000 acres and firefighters to quench it. It swept over a 15-mile stretch of cut-over timberlands near Poland, 65 miles west of here.

Lesser fires are burning at several places in the eastern section of the Thunder Bay district, causing considerable damage, and all available men in the area were drafted to fight them.

A Canadian National Railway bridge was destroyed near Hornepayne, temporarily cutting off communication between Long Lac and Fort Arthur.

Brighter Outlook

Twenty Thousand Men Added To Industries In The East

Winnipeg, Man.—Saying that in May alone 20,000 men had been added to industries in the east and that in his trip through the west he had seen hundreds of men engaged in mining, lumbering and manufacturing, Hon. H. H. Stevens, Minister of Trade and Commerce, said trade and commerce in the Dominion was encouraging. "Transportation is decidedly brighter," he said. "Carloading and passenger transportation both show marked improvement. The cars are moving well and 40,000 head will be shipped to Britain this season."

Was Friend To Animals

New York.—The animals would be sad if they could understand, Harry Houdini said, that the Humane Society of New York, who spent 10 years helping suffering beasts, is dead.

Canadians occupy a prominent place in the World Federation of Education Associations which is to hold its fifth Biennial Conference in Dublin, Ireland, this month. It will bring together outstanding educational leaders from forty or more countries with the object of cultivating and developing views on educational matters. The Dominion is represented by Harry Charlesworth (centre), Vancouver, B.C., as vice-president of the organization; Dr. E. A. Hardy (right), Toronto, as Treasurer, and Dr. D. D. MacDonald (left), Toronto, a member of the board of directors.

Tragedy Follows Buddha Idols

Unlabeled Letter With Images Says They Possess 'Evil Influence'

Two wooden images of Buddha and a stone reproduction of the god have left a trail of disaster in the homes of three London business men who in turn became their owners.

None of the three men believes in superstition. Yet in each case they have been the victim of strange ill-fortune.

"Within three days of the idols being placed in the sitting room of his home in south London," said a friend to a London newspaper representative, "the third man was struck down by a severe and little-known malady."

"He is engaged in the insurance business, and is noted for his hard-headedness. He had been warned of the evil influences exerted by the idols, but had laughed at the idea."

"The first two men who owned the idols for a while had ample evidence of their uncanny power to bring trouble in their train."

"Victim number one is a city man with offices in Bishopsgate. One day the parcel containing the images of the god arrived at his office from an unknown source. He was on an Atlantic holiday cruise at the time."

"Yet on that day he was struck down with pneumonia. When he finally reached home his office was burgled—but the still unopened parcel was not touched."

"In the parcel was an unsigned letter, which stated that the images possessed an 'evil influence,' but no explanation was given why they had been sent to him."

"He consulted a famous medium, who said that the idols were Chinese, and belonged to the Ming period. She begged him to rid himself of them by throwing them in deep water."

"A few weeks later he gave them to a friend, having previously told him their history. His friend laughed, but three days later he was in hospital, having lost his memory and collapsed in the street."

"Now a third man has paid the penalty of possessing the 'idols—he was taken to a nursing home—and his wife is terrified lest further disaster shall come to the house, where the idols now are."

Mysterious Old Man

Ontario Motorists Telling Stories Of Exotic Experiences

Here's another story of the mysterious old man, when picked up on the road, converses for a while and then disappears mysteriously from the back seat as the car pulls along at 50 or 55 miles an hour.

A Waterloo, Ont. motorist swore it happened. Another at Guelph was angry when friends doubted the story. A Kitchener lawyer now tells the tale.

"He was driving along when he met the old man with the patriarchal beard. The car stopped. The old man got in the back seat."

"Well," the driver said, "times are pretty tough on you, eh?"

"They are," the old man replied. "But the depression can't mark any words. It ended on June 7."

The driver chuckled. "You seem to know."

No answer from the rear seat. "I say," repeated the driver in a louder tone. "You seem to know."

Still no reply. The driver looked around. The rear seat was empty.

A Unique Ship

Motorists following the Allegheny Highway through the Allegheny Mountains, east of Pittsburgh, United States, are amazed to find a "steanship" perched on the side of a mountain at one point where there is a particularly fine view of the surrounding country. The structure is a hotel and restaurant, built in the form of a boat, and stands at an elevation of 2,464 feet. From its deck tourists look in from three and seven counties.

Noted Architect Dead

Frank Worthington, since architect who designed Manitoba's Legislative Buildings, and Fellow of the Royal Institute of British Architects died at Mentone, France, May 10. Other famous buildings designed by Mr. Simon include the Edinburgh International Exhibition, and the Liverpool Cotton Exchange.

Meat is made up of small fibres about 1,750 to 1,400 of an inch diameter, and up to about 1 1/4 inches long.

"What would you do if you got a rich wife?"

"Absolutely nothing."

W. N. U. 2000

BRITAIN'S FLYING DAREDEVILS EXECUTE DIFFICULT STUNT

Our press photographer was fortunate to catch this trio of Royal Air Force planes as they shot into the air tied together with cords to perform a series of break-taking stunts. The daring pilots were putting on their show as part of the Royal Air Force Pageant at Hendon, England.

Strange Tribe Discovered

Unknown Aboriginal Village Found Is To Be Tried Out By Long Island Railroad

On Island Of New Britain

Two hitherto unknown aboriginal villages, where widows insist on being strangled to death, have been discovered on the island of New Britain.

Patrol Officer H. R. Niall, of the New Guinea police came upon the villages while on an expedition across the island which lies to the east of New Guinea.

When a village died his widow demands death by strangulation in order that her spirit may be freed from it.

"On some occasions the men, being afraid of consequences, have resorted to strangle a woman," the report continues.

"At times sometimes happen that the widow takes off her grass skirt and hands it to the men, telling them to put it on and saying that they are only women and not real men. This so shames them that they reluctantly kill her according to custom."

"Consummation of the weird ritual is the duty of the widow's brother or her nephews who wind a native bany cloth around her neck and tighten it until she is choked."

Says Shakespeare Died After Merry Meeting

Party Was Host's Finish

Diary in Washington Library States That Shakespeare Died After a Party

William Shakespeare died after a "merry meeting" at which "it seems he drank too hard," according to the manuscript diary of Dr. John Ward who lived at Stratford-on-Avon a few years after the death of the Elizabethan dramatist.

Ward's diary is in Folger Memorial Library at Washington. It reads in part:

"I have heard that Mr. Shakespeare was a natural wit, without any art at all; he frequented the plays all his younger times, but in his elder days lived at Stratford, and supplied the stage with two plays every year, and for it had an allowance so large, that he spent at the rate of £1,000 a year, as I have heard."

"Shakespeare, Drayton and Ben Jonson had a merry meeting and it seems drank too hard, for Shakespeare died of a fever three contracted."

Balance On Credit Side

Gold Fillings More Than Paid Australian's Dental Bill

A man in Brisbane, Australia, has found that there is considerable profit in having a mouth that is on the gold standard. He went to a dentist to have some teeth extracted, and when he asked for his bill found that he did not owe anything. There was in fact money coming to him.

The dentist handed him thirty shillings, which was the balance due him after he had been credited with the gold in the extracted teeth. With gold at its present premium there is money in the fillings of worn-out teeth.

Spends Time On Sea

Frau Amalia Schlegel, who is 92, has made 62 crossings of the North Atlantic. Why? To while away the time.

"I am an old woman," she said before embarking for her 63rd voyage, "and I travel alone because I am all alone in this wide, wide world."

Large estates in Scotland are to sell their products direct to consumers.

Employment in Italy is increasing.

Germany's New Rail Bus

The Long Island Railroad, one of the world's biggest carriers of suburban commuters, plans to try out a new type of railbus brought for the Chicago Century of Progress Exposition from Germany. The bus, made by the Austro-Daimler-Puch Works, is 28.6 feet long, seven feet eight inches wide and eight feet eight inches high. It is propelled by two 80 horsepower motors and develops a top speed of 90 miles an hour.

The car has double control and may be operated from either end. It has a double set of wheels, one of rubber and one of steel, the former being on the inside. It was explained that the rubber wheels carry the weight of the car while the machine itself is directed by the steel wheels.

A locomotive is guided automatically by the rails. The rubber and steel wheels are on distinct axles.

With the car when it arrived was Oskar Hacker, chief engineer of the company which built it, and Josef Manoldner, chief mechanic. Hacker said six of the buses were now in use in Austria, two in Poland and several are now being shipped to Ecuador. They weigh 20,000 pounds and accommodate 45 passengers.

Sensor Copper Is Optimistic

Predicts Dollar Wheat For U.S. By End Of Year

Senator Arthur Capper, of Kansas City, looks for dollar wheat by the end of 1933.

Cheerfulness about the future was the keynote of an interview given by the United States Republican senator, a veteran in the fight for remedial farm legislation.

He said commodity prices should continue to rise, thus increasing employment and wages. He said, by the end of the year wheat will yield the farmer 31.

Convinced the Magistrate

Charged with speeding, Aubrey D. Smith carried several tiny automobiles into the police court, placed them on the magistrate's table and showed Magistrate J. L. Barnhill just how it happened. He illustrated a situation in which it was necessary for him to speed as protection for himself and other drivers, and was acquitted.

It appears that a man can be cured of stammering by being taught to sing. Unfortunately a man can't be cured of singing by teaching him to stammer.

Sweden Misses "Singing Count"

Original Character Of Stockholm Was Worsened By Poor

The "Singing Count," one of the most popular and original characters of Stockholm, died in his home recently. Count Magnus von Rosen undoubtedly enjoyed greater popularity amongst rich and poor than any other public figure in Stockholm. He was a Bohemian aristocrat, always dressed with the most elaborate elegance, a man about town who would be seen daily leisurely walking along the most fashionable thoroughfares or in the midst of his friends in some popular restaurant or cafe. He had a pleasant voice and received his nickname from his habit of singing aloud in the streets as he walked along and late night wanderers would often hear his gay echoes through the empty streets.

He was worshipped by the poor for he would always stop wherever he saw some one in need to give him one of the one-crown pieces which his pockets were filled accomplished by some cheerful and friendly words. As a young man Count Magnus travelled for years in many parts of the world, including Australia, America and the East. He returned and settled down for good in Stockholm, which he loved more than any other place, and where he spent his time in making friends and in spreading the number of his kind heart and gay wit along his path. The Stockholm press and public mourn him as one of the best representatives of the "good old days" and regret that the gay voice of the "Singing Count" has ceased to echo through the streets of the "Venice of the North."

Crossed Channel On Surf Boat

London Man Towed Across From Dover To Calais

Captain Darcy Rutherford, of London, who has crossed the English Channel from Dover to Calais on a surf boat towed by a speed boat driven about 13 miles an hour. He reached Calais in an hour and 40 minutes.

The time would have been less but they hit the wash of a big steamer, and several times Captain Rutherford had to lie flat to avoid being thrown over. The cold was intense, as he was wet through and wore only shorts and a sweater.

Highway Bridge Joins Venice To Mainland

People Afraid Motor Traffic Will Disturb City's Peace

Venice, pearl of the Adriatic, has lost its long isolation with the construction of a highway bridge to the mainland, two and a half miles away. Residents of the City of Lagoons saw automobiles invade Europe's "most serene republic" for the first time. Many of the older residents had never seen an automobile before.

The new bridge, built at a cost of \$4,500,000, parallels the Ponte Sulla Laguna, a railroad bridge built 87 years ago. Some Venetians fear the advent of motor traffic will disturb the peace of the old city. The gondolas, and its chauffeur, the gondolier, is bound to stay, however, as there are still many unbridged canals dividing the center of Venice from the outlying parts.

Hostels For Hikers

Youth hostels are rapidly being opened in Scotland for the benefit of hikers. They can stay over night for a nominal sum and prepare breakfast in the morning. In 1931 there were ten more and already in 1933 the total has reached thirty-two. In the first year 3,159 "bed-nights" were recorded and last year the total had risen to 22,356, which figure is expected to be far exceeded in the present season.

The French West Indies report

that 1932 was a prosperous year there.

British ships earned \$260,000,000 in the last year.

International Gang Of Spies Operating

Industrial Espionage As Well As Naval And Military

Espionage is no longer merely a matter of one country creating an organization for ferreting out the military and other secrets of its neighbors, French secret service authorities declare.

It is now, in fact, rapidly passing into the hands of a sinister international body with branches in every important center. This syndicate has as national production.

It is organized entirely on commercial lines and makes its business the collection of all information regarding the naval, military and aerial defenses and preparations of the different countries.

Its information is at the disposal of any nation willing to pay for it, and it is known that in many cases the usual secret service agents of different countries have found it easier to buy their information from this syndicate.

According to the French authorities the head of the organization is an Englishman, but his lieutenants are men of all nationalities, and a number of women are employed as secretaries. Numerous persons suspected of being in the confidence of the syndicate are retained in different countries.

The gang also concerns itself with industrial espionage, collecting and disseminating information about new industrial processes, and selling this to trade rivals of the firm concerned.

It has been proved conclusively that several suspected spies dealt with by the French courts recently on the assumption that they were employed by this syndicate, and the French government has passed on to at least three other European powers interested in French defense problems.

Parachute Jumper Makes Contribution To Science

Proves Consciousness Not Lost When Falling From Great Height

A parachute jumper in England created a record recently when he jumped from a height of 10,000 feet. He was not killed, but he had fallen a distance of over four miles. Then he landed quite safe and with all his wits about him.

This was a marvellous achievement, and was performed, not as a sensational "stunt," but as a contribution to science. People sometimes say that because a man fell from a great height he would be dead before he reached the ground, but this demonstration proves that there almost no limit to the possible height which a human being may attain and fall to the ground fully conscious.

In this experiment the parachutist tumbled over and over, sideways, head first and feet first, at a speed which reached 100 miles an hour, yet he not only remained fully conscious until he opened his life-saver, but kept his head clear and was able to pull the cord at a critical moment.—St. Thomas Times-Journal.

Challenge To The Girls

Preacher Says They Do Not Fit In With Higher Education

The modern girl doesn't fit into the picture of higher education, according to Rev. Neil Herman of Halifax, Nova Scotia, who says the feminine mind cannot grasp many college subjects.

"You cannot fit the girl of this generation into the picture and have anything else but a puzzle," he declared in a sermon on "Our Latest Puzzles."

"The girl who is called upon to study the entire picture of history becomes a radical in some form or other," he continued. "Hundreds of thousands of them pass examinations, but they know nothing of what they read or what they are taught."

Where Women Are Barred

British women are not permitted to hold office in the diplomatic and consular services. They can, however, consult, nor may they hold the higher administrative posts in the three Defence Departments on the ground that they are not liable to military service.

Most Important

"You will find that the most important is the best argument you can have in proof of your property," said a salesman.

"If that is true," said the prospective purchaser, "what I now want to know is, shall I always be able to drive that argument home?"

Canada is the largest exporter of newspaper in the world.

Chas. L. Dunford

Agent.

Oyen, Alberta.

About Town and Country

Tonsil Clinic, July 6, 1933, in Grand Hospital. Fifteen dollars cash. Parents are asked to notify Dr. D. L. Dick, Oyen, of cases for the removal of Tonsils or Adenoids.

Mrs. Elmer MacArthur who underwent an operation for appendicitis in the Holy Cross hospital, Calgary, on June 19, is reported to be making very satisfactory progress.

Mr. M. G. Whitlock left last Thursday on a business trip to Winnipeg. During his absence from Oyen, Mr. R. J. Martin, is in charge at the local depot.

Mr. Thos. Lees and Mr. James Lees were business visitors in Calgary the latter part of last week.

Mr. and Mrs. C. A. Bishop, Mr. R. Cates and Mr. Frank Austin were Hanna visitors last Saturday, attending the Acadia Federal convention.

Special honour was done recently to two Alberta government officials, when J. D. Baker, general manager of the Alberta government telephone system, was re-elected president of the Canadian Telephone Association and Alex. Mitchell, controller of the government system, was re-elected to the post of secretary.

Two new airports, to be built as part of the unemployed relief program in the province, will be proceeded with shortly. The most important will be a seaplane base at Cooking Lake, east of Edmonton, built as a joint civic-provincial project, the province purchasing the necessary land and the city of Edmonton to operate the port as an extension of its large airport in the city. The construction of this port will mean the transference of a large proportion of the air travel of the northland from Fort McMurray to Edmonton, as at present the passengers from the north must come to the capital city, by train from McMurray. Another airport is to be built at Coleman with unemployed labour. About 100 men will be employed at Cooking Lake and the same at Coleman under the direction of the provincial relief commission.

Several years ago people were singing a popular song, which at the time seemed very inappropriate, because the season was a decidedly wet one. Perhaps if this song were revived, it might have a dampening effect. All right, boys (and girls) all together, "Oh, it ain't going to rain no more no more, it ain't going to rain... etc."

Mr. and Mrs. F. C. McClean returned home to Oyen last Saturday, after spending a month in Calgary.

Mr. George C. Meyers who has been east in Ontario for a month, returned to Oyen Tuesday morning. On his return from the east Mr. Meyers spent three days at the Chicago fair.

Mr. A. E. Todd, returned home from Kindersley the latter part of last week after a few days in the hospital. Mr. Todd had several ribs broken and one of his lungs injured, when he was kicked by a horse.

Construction of the large new sugar storage facilities at the plant of the Canadian Refineries at Raymond, near Lethbridge, is proceeding. The new bins will provide storage for four million lbs. of sugar.

Excel Items

In last week's issue, the date of the Acadia Provincial convention, was incorrectly given as July 5. The convention will be held in Cereal community hall on Tuesday, July 25. Arrangements are being made for at least two outside speakers to be in attendance.

Those attending the convention from this locality, included Mr. and Mrs. C. A. Bishop, Mr. R. Shaw, Mr. S. L. Kline, Mr. R. Cates, Mr. D. Warwick, Mr. H. Charters, Mr. Frank Austin and Mr. and Mrs. Lorne Cole.

In a free hitting game, which was full of exciting incidents, an aggregation of softball stars from Oyen, went down to defeat at the hands of the Excel softball team, Tuesday night. The score was 29 to 16, in favor of Excel.

ANNOUNCEMENT

P. M. Marquardsen

Teacher of Piano and Violin
Graduate of the Royal Conservatory
of Music, Copenhagen.

Will be in Oyen, on Friday afternoon, July 7, to arrange classes. If a sufficient number of pupils desire to take lessons, regular weekly classes will be started. All interested are invited to communicate with Mr. Marquardsen, care of Oyen News.

Reduced Rates

M. D. of Bertawan

The council of the Municipal District of Bertawan met on Saturday, June 10, in Sibleid at 2 o'clock in the afternoon.

Present: Reeve Mowers, Councilors: Hunter, Meade, Musser, Stauffer and Wilson.

In connection with complaints received of grasshopper damage it was decided on motion of Councilor Meade to establish a mixing station at Sibleid.

Moved, Wilson: That the Reeve be authorized to send Mr. Shankey for a truck load of sawdust at once.

Moved, Stauffer: That the Reeve and Secretary be authorized to procure a gas engine, and arrange for the operation of a mixer plant, and delivery of poison to applicants.

Moved, Stauffer: That R. D. Morton receive an order for \$3.00 for relief today, and that no more relief be authorized for him until the amount has first been worked out.

Moved, Stauffer: That the Secretary be instructed to ask the Debt Adjustment Board for a further reduction in the Seed Grain charges at present registered against the E.J. of 19-27-3.

Moved, Mowers: That Peter Peterson be Poundkeeper for Division No. 6 in succession to Mr. Griger who moved from the location of pound.

Moved, Musser: That letter re \$5 of 12-29-1 be tabled until we hear further re discharge of liens.

Moved, Meade: That the mill rate be 7 mills.

The accounts were passed for payment on motion of councilor Meade.

Acadia Federal U.F.A. Con- sultancy Association Convention

(Continued from page 1.)

A very pleasant part of the evening programme was the presentation to Mr. R. Cates of a Parker pen and pencil set by Mrs. R. C. Fraser on behalf of the constituency. Mr. Cates had been president since the association was formed nine years ago until last year when he refused the nomination. Mr. Cates gave a very fitting reply. The officers for 1933-34 are: President, James Cameron, Wastins. Vice-presidents, Mrs. R. C. Fraser, Secretary, J. K. Sutherland of Hanna. Directors for district No. 4, Mrs. C. A. Bishop, Excel and Mr. Justin Berg, Cereal. District No. 3, Mr. G. S. Sturmer, Loyalist and Mrs. Harry Shannon, Sedalia. District No. 2, Mrs. J. K. Sutherland, Hanna and Mr. R. Hooper, Rowley. District No. 1, Mr. G. Hanson, Pollockville and Mrs. Pierce, Carobide.

Resolutions discussed were: A wheat board for this year, (passed). Asking that normal entrance fee be put back to \$40 as in former years, (carried).

Destruction of pests to be paid by a wheat deduction. Others resolutions concerned the new School Grants Act, "the Douglas System", etc. The last named were not dealt with fully, owing to lack of time and were referred to the board of directors for further consideration. The convention which was the largest for several years, (the hall being filled to capacity
